

Secondary School

Teachers' Guide to Walking Maps

SmartSteps®

FOR SECONDARY SCHOOLS

www.walkingmaps.com.au

Walking Maps is a fantastic resource for your classroom. This free and easy-to-use website is visually engaging, adaptable and multi-layered in content, making it the perfect teaching tool.

With Walking Maps, you can easily create, discover and share walks:

- ✓ In conjunction with [Smart Steps Secondary School Resources](#), which are matched to the AusVELS curriculum
- ✓ As a resource for excursions or other off-site activities
- ✓ To foster greater connections between students and their local community
- ✓ To enable senior students to enhance their local knowledge while showcasing or developing their digital literacy

Walks are easily printed and shared via email,  or 

When creating a walk, there are also some key points for teachers to remember:

- Limit the number of walks created to one per class or one per group.

• **Include at least 5 points of interest, attractive photos and descriptions.**

- Show the walks off to your school community by promoting them on your school's website, Facebook and newsletter.
