

Nature bracelet walk

SmartSteps
FOR FAMILIES

A walk around the neighbourhood in search of treasures!

Age:
3-6 years

Length:
A short stroll

You will need:

- Masking tape or strong sticky tape
- Scissors

This is a great activity for young collectors.

Before your walk, loosely wrap a piece of thick sticky or masking tape around each child's wrist, sticky side up. Make sure they don't brush it against their clothes too much because it will lose its stickiness.

As you walk, encourage children to attach leaves, petals, pebbles and other interesting discoveries to their 'bracelet' until the bracelet is covered with treasures.

At home, snip off the tape with scissors. Children can display their treasures on a shelf, pin board or the fridge.

TOP TIP: Why not take this walk on the way to childcare or kindergarten – children will have a great bracelet to show off to their friends!
