15. In assessing the Applications, Victoria Walks may:
- a) consider any Application, including any Submission, or any other matter; and
 - b) place any weight on the Assessment Criteria as it sees fit.

Assessment Criteria

16. The assessment of Applications (including any Submission) will be made against the following Assessment Criteria:
- a) An innovative response to the *Park&Walk* grants program that delivers physical infrastructure and/or environmental improvements for identified primary schools that have a significant number of students who exhibit low walk-to-school behaviour and who live more than 2km from the school gate. Council improvements will reduce barriers to active travel and provide safe opportunities for these students to walk between 500 metres to one kilometre to or from school on a frequent basis each week.
 - b) Through the design and implementation of one or more *Park&Walk* Projects, your council can demonstrate its engagement with identified primary schools where distance to school, traffic and pedestrian safety as well as local walkability have been ongoing issues and which a *Park&Walk* Project could alleviate.
 - c) Your council has a demonstrated commitment to active travel and is able to articulate the relevance of your *Park&Walk* Project proposal to the needs of the identified primary school communities in your municipality.
 - d) Your council has the capacity and readiness to create one or more *Park&Walk* Projects that will be delivered on time and within budget. If possible, your proposed *Park&Walk* Project can promote VicHealth's *Walk to School* campaign and other active travel initiatives as part of the engagement strategy with the school community.
 - e) By committing to a collaboration with Victoria Walks to establish a robust evaluation methodology, your council is willing to actively participate in designing the evaluation framework, the data collection and data analysis in order to gather evidence that can test the effectiveness of the *Park&Walk* initiative.

- f) Your council is willing to share and disseminate the lessons of implementing *Park&Walk* Projects. In addition, if your proposed project lends itself to further research, your council will consider participating in a Randomised Control Trial proposal from VicHealth.
- g) The level of financial and/or in-kind support your council can bring to the project.

17. In addition, the following components of each Application (including any Submission) will be considered as part of the assessment process:

- a) **Relevance**: whether the Application explains council's position to design and deliver *Park&Walk* initiatives that specifically respond to the local community, environment and issues of that council.
- b) **Equity**: whether the Application provides evidence of initiatives that cater for primary school students and their families in the funded target group who, through the provision of *Park&Walk* Projects, are more likely to walk part-way to or from school because the barrier of distance has been addressed in relation to walkability options.
- c) **Learnings and Growth**: whether the Application demonstrates the council's willingness to participate in a collaborative approach to developing an evaluation methodology that tests the efficacy of *Park&Walk* Projects on walking behaviour for primary school students and their families in the funded target group. In addition, councils that have documented the lessons of participating in the *Park&Walk* Program will share this information with Victoria Walks and VicHealth, and other organisations as deemed appropriate by the council, Victoria Walks and/or VicHealth.

18. You acknowledge and accept that Victoria Walks may allocate different weightings to this Assessment Criteria in its assessment of Applications and any decision to do so is at the sole discretion of Victoria Walks.
